GJET SERIES

JETTER TRUCK

GAPVAX **GJET** **SERIES** GAPVAX JETTER TRUCK

Simplicity and reliability are the hallmark of GapVax products, and the GJET is no exception. Our time-tested front-mounted hose reel gives you strength, simplicity, and a user-friendly design.

Safety is vital, and it starts with the chassis frame. The hose reel mounts to dual-frame rails that extend beyond the front bumper. This design improves the reel's strength, extends the life of the hose reel bearing, and keeps the operator away from engine heat and noise. In addition, the internal tank baffles help steady the truck when driving with a load of water. Finally, the front-mounted reel location shields the operator from oncoming vehicles when the truck is positioned with the traffic flow.

Our sales team and dealers will work with you to determine the perfect blend of tool storage and water capacity while considering optimum axle weights. Models range from 1,000 gallons to 3,000 gallons.

STAINLESS STEEL WATER TANK

- 1,000 TO 3,000 GALLON CAPACITIES
- STAINLESS STEEL MANWAY
- STAINLESS STEEL BAFFLES
- STAINLESS STEEL ANTI-SIPHON
