GAPVAX MC SERIES
COMBINATION JETVAC

NEED CNG? NO PROBLEM!

Engineering excellence meets alternative energy. GapVax is proud to support CNG-powered chassis for our industrial vacuum loaders and sewer cleaners. Our engineers work closely with chassis manufacturers to ensure seamless integration of CNG fuel systems, maintaining optimal weight distribution and debris body capacity.

ASK ABOUT OUR DEDICATED HX PACKAGE

GapVax's dedicated HX pump isn't an "add-on"—it's a performance-matched system designed specifically for hydro-excavation. The GapVax MC Series truly is the most versatile combo on the market!

GAPVAX MC SERIES
COMBINATION JETVAC

GAPVAX MC SERIES
COMBINATION JETVAC

The GapVax MC is a versatile, operator-designed combination unit built to meet the daily demands of government agencies and contractors alike. Engineered with high-quality materials and long-lasting components, the MC delivers dependable sewer cleaning and vacuum performance in a single, efficient platform. Its robust construction, intuitive controls, and operator-focused design make it well suited for maintaining lift stations, sewer systems, catch basins, and other critical infrastructure where reliability and uptime matter most.

For customers requiring additional flexibility, the GapVax MC can be equipped with an optional hydro-excavation system, allowing crews to safely and efficiently expose underground utilities or remove compacted material when needed. Powerful vacuum performance, an extendable boom for improved reach, and a fully opening tailgate for easy material offloading help crews work more efficiently throughout the day. Like all GapVax equipment, the MC is configurable to match operational needs and budget considerations and is backed by GapVax's nationwide support network—delivering long-term value, versatility, and confidence in the field.

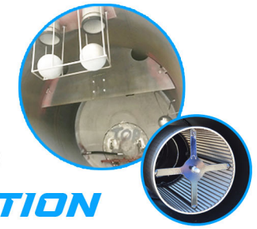

BOOM SYSTEM:
- 8" Telescoping boom, with a 180° rotation
- Standard 9' extension, 26' reach from center
- Heavy duty dual lift cylinders
- Worm gear driven

8" TUBE IN TUBE BOOM

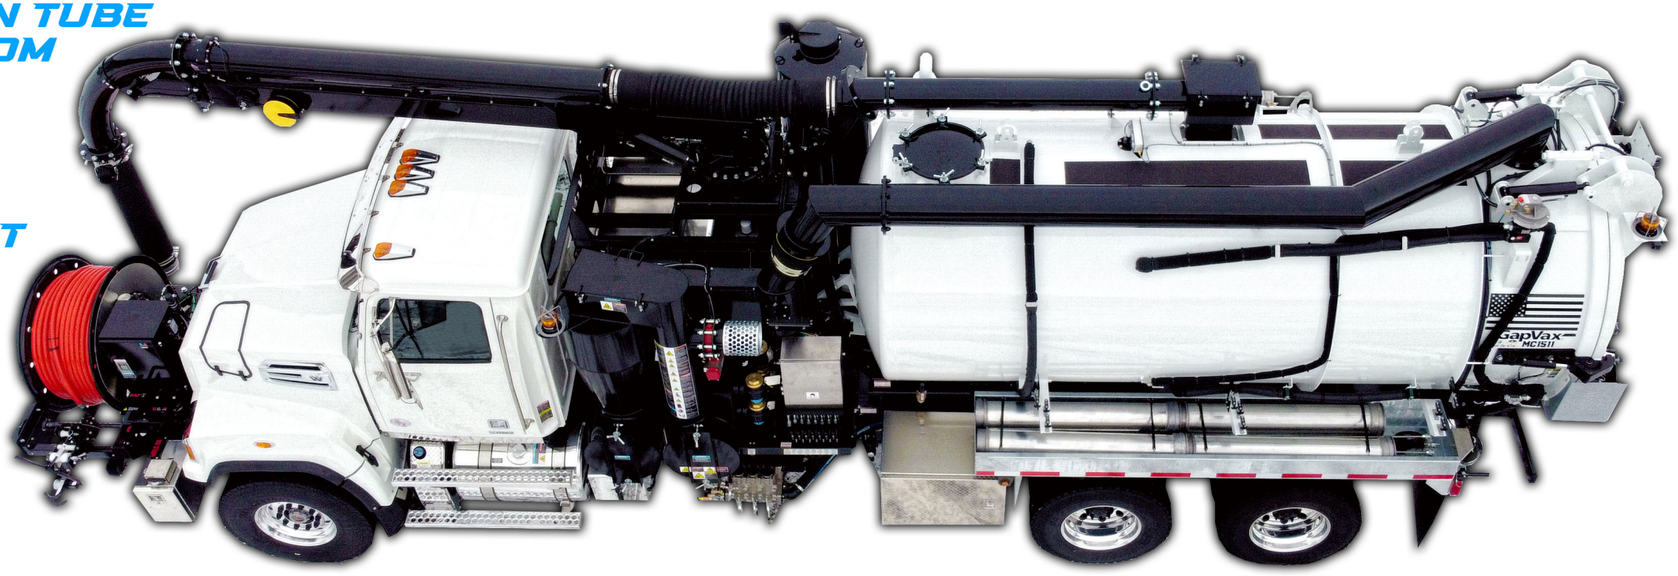

VACUUM SYSTEM:
- Positive displacement vacuum pump
- 500 HP transfer case with air-shift engagement
- Optional 4,500 CFM/27" Hg PD Blower

4,500 CFM, 18" HG PD BLOWER

FILTRATION:
- 10" Stainless steel floatball shutoff
- Centrifugal cyclone separator with full-opening door, 20" cleanout and removable vortex finder
- Washable, stainless steel vee wire screen (300 micron)

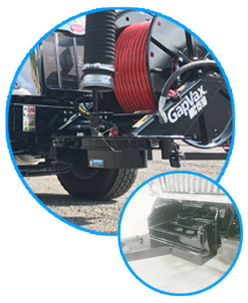

MULTI-STAGE FILTRATION

EXTENDED FRONT FRAME RAIL

FRONT HOSE REEL:
- 180° Rotation
- Hydraulically powered direct-drive gearbox
- 1"x 800', 1-1/4" x 500', or 3/4"x 1,200' reel capacity
- Optional auto-level wind
- Fully enclosed control panel

80 GPM; 2,000 PSI

WATER SYSTEM:
- 500-2,000 gallon water tank capacity
- Stainless steel water tank
- Shaft-driven Tri-plex water pump
- Optional water pump flow up to 100 GPM and PSI up to 3,000

TOP LOADING BODY

DEBRIS BODY:
- 5-12 cu. yd. debris body options
- Double acting lift cylinder that provides a stable 50° dump angle for fast unloading and easy clean-out
- Full opening tailgate with four fail-safe locks; locks are "field-adjustable" with a simple wrench
  *Single axle configurations available

OPTIONS:
- Stainless steel debris body
- HX package
- Pump-off systems
- Body flush-out system
- Interior coating in debris tank
- Lateral hose reel kit
- Hydraulic tool circuit
- Wireless remote/pendant
- Storage options
- Lighting options
